

AERIAL SURVEYS

A HIGHER STANDARD OF SITE SURVEYS

COST EFFECTIVE AND SAFE SURVEY SOLUTIONS

Beton Bauen provide professional and commercial aerial surveys for the construction, transport and infrastructure sectors. We provide a comprehensive photographic and/or video visual inspection service that is safer, quicker, more detailed and more accurate than traditional methods.

Carrying out drone surveys is slowly becoming standard practice as many industries move to minimise health and safety risks. Using drones reduces the need to work at heights. Moreover, it's quicker and cheaper than traditional methods such as scaffolding, tower, helicopters or aeroplanes.

Unmanned Aerial Vehicles (UAVs), more commonly known as drones, offer the client a significantly cheaper surveying solution than other methods, with real cost savings. Other benefits include the ability to reach and survey sites and structures that are normally inaccessible, often providing more accurate and comprehensive data than traditional methods.

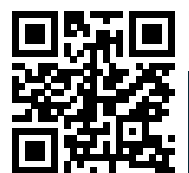

Beton Bauen can carry out a wide range of drone surveys for many different industries and we work to the very latest legislation and standards. Our experienced and qualified pilots are able to provide effective solutions, causing minimal disruption to site operations, whilst eliminating the need for more costly forms of access. From eye level to sky level, we can provide safe and efficient solutions to challenging or restrictive environments.

Get in touch with Beton Bauen for further information and detailed estimates concerning Aerial Surveys by email to ENQUIRIES@BETONBAUEN.COM.

PRACTICAL SOLUTIONS

Beton Bauen has experience of working with a wide range of industries and sectors. Practical solutions include (but are not restricted) to the following:

- HIGH RISE BUILDINGS & ROOF INSPECTIONS
- MEASURED BUILDING SERVICES
- ENGINEERING SURVEYS
- OFFSHORE PLATFORMS
- UTILITIES & POWER INDUSTRIES
- TREATMENT & WATER WORKS
- CHIMNEYS
- LARGE SCALE DEVELOPMENTS
- RAILWAY NETWORKS
- ROADS & HIGHWAYS

BETON BAUEN SERVICES

CONCRETE SPECIALIST CONTRACTORS IN THE UK AND BEYOND

THE BETON BAUEN STORY

Beton Bauen Limited is an independent, family business, led by Managing Director, Steve Davies. Founded in 2006, the company has grown considerably and is now regarded as a leading specialist in Concrete Repair, Structural Waterproofing and Ground Gas Protection within the United Kingdom and overseas. We work extensively in the field of highways and road infrastructure, as well as specialist works including sea and flood defences.

Originally established in Newport (South Wales), our head office relocated in 2014 to larger, dedicated premises in Caerphilly, with convenient transport access to the M4 'corridor'. The bulk of our contract work is located within the South West of England and South Wales areas, for large organisations from various private sectors such as Engie, Welsh Water, Skanska, RWE and TATA Steel Europe, plus a great number of local authority councils and public sector organisations like the DVLA, NHS and Cardiff City Council.

Beton Bauen has been involved with major projects further afield, including South East Asia and more recently supporting oil and gas industries in the southern states of the USA. We have also completed projects in Ireland, continental Europe, the Middle East and Africa, gaining extensive experience of working in some of the most challenging and difficult environments.

Beton Bauen provides a dedicated and reliable service, combined with exceptional customer care. We plan and manage operations professionally, whether a long-term construction project or an emergency repair. We continue to enjoy rapid growth and expansion, due largely to repeat business and regular contracts from a large number of loyal and satisfied commercial clients.

BETON BAUEN CORE SERVICES

- CONCRETE REPAIR & PROTECTION
- STRUCTURAL WATERPROOFING LEAK
- GROUND GAS PROTECTION
- LEAK SEALING & STRUCTURAL INJECTION
- CONFINED SPACE WORKS
- WATERPROOFING & TANKING SYSTEMS
- SPRAY APPLIED WATERPROOFING
- SPECIALIST GROUTING
- SPRAYED CONCRETE
- SPRAYED MEMBRANES
- INDUSTRIAL FLOORING REFURBISHMENT
- FACADE CLEANING & PROTECTION
- HYDRODEMOLITION
- SITE SURVEYS & CONCRETE TESTING
- INTRUSIVE / NON-INTRUSIVE SITE INVESTIGATIONS
- AERIAL SURVEYS
